

An Integrated Engineering Powerhouse

Mumbai-based multi-sector engineering firm specializing in marine operations, electrical systems, fabrication, and industrial maintenance.

Proven execution capability catering to high-demand, mission-critical sectors including Custom Departments and Naval Authorities.

Built on a bedrock of multi-disciplinary technical expertise, rigorous reliability, and strict adherence to safety standards.

Rapidly scaling into international markets with a strategic focus on high-value marine and renewable energy projects.

Our Strategic Heading

To become a globally recognized leader in marine engineering, shipbuilding, and renewable energy solutions.

Execution

Deliver high-quality engineering and maintenance services.

Expansion

Expand globally with sustainable and scalable solutions.

Partnership

Build robust, long-term relationships with clients.

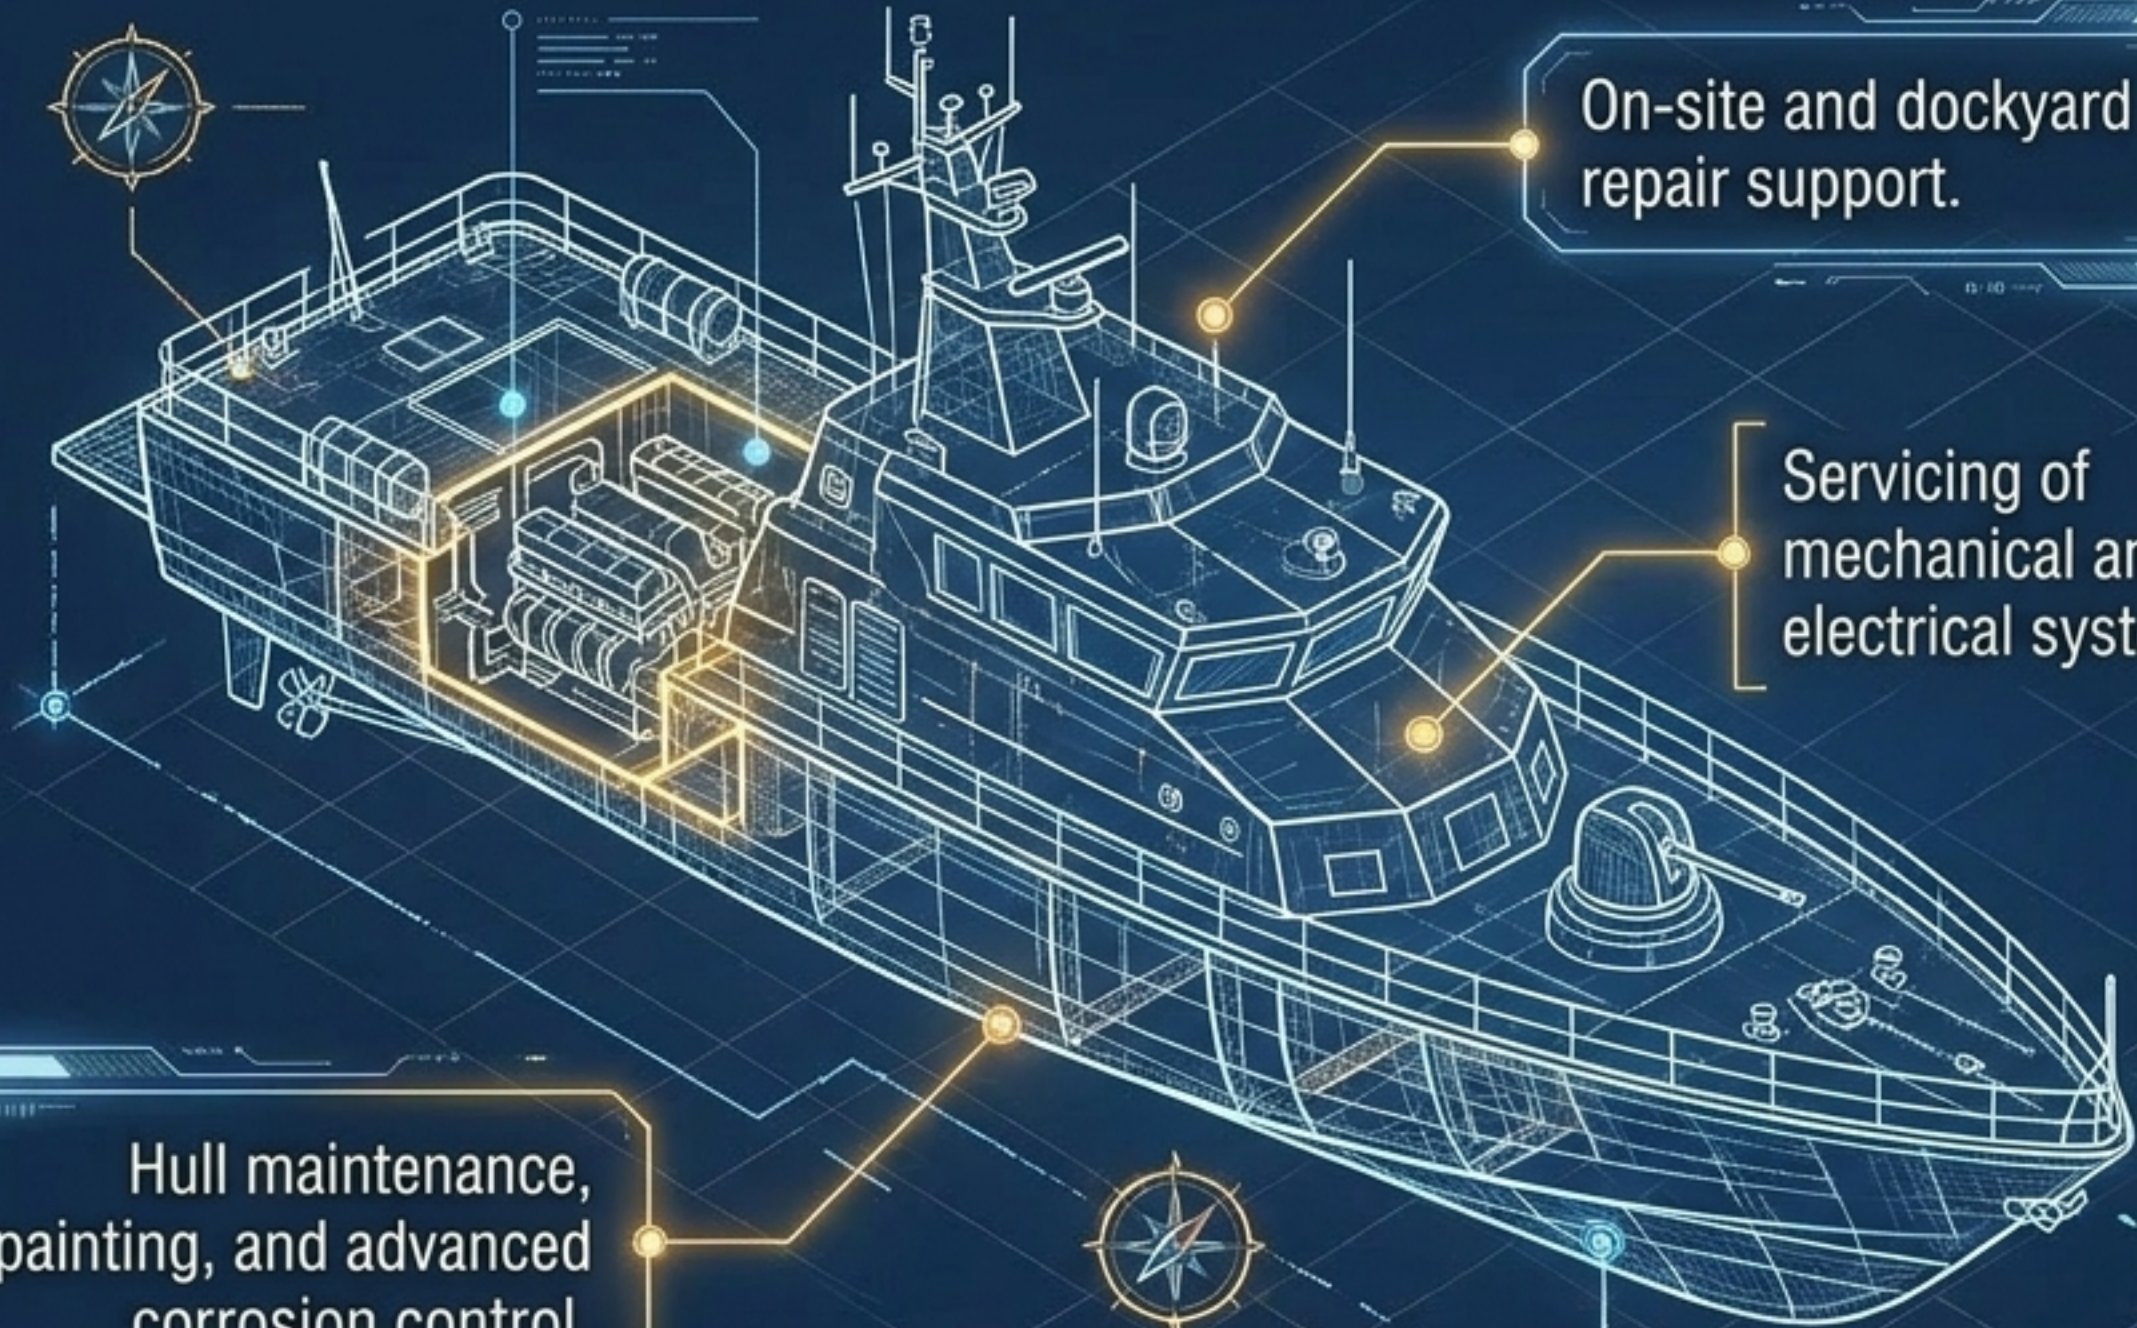

Evolution

Drive relentless innovation in marine and energy sectors.

The Pillars of Our Engineering Ecosystem

Marine Services: Ensuring Mission-Critical Readiness

On-site and dockyard repair support.

Servicing of mechanical and electrical systems.

Hull maintenance, painting, and advanced corrosion control.

Dedicated repair and maintenance services specifically tailored for Custom Department patrolling boats and Naval defense ships.

Electrical Engineering: Safe, Efficient, Compliant

Design & Supply

Provision of industrial and marine electrical systems, including LT/HT, MCC, PCC, AMF, and synchronization panels.

Installation & Routing

Expert cable laying, termination, and complete transformer installation.

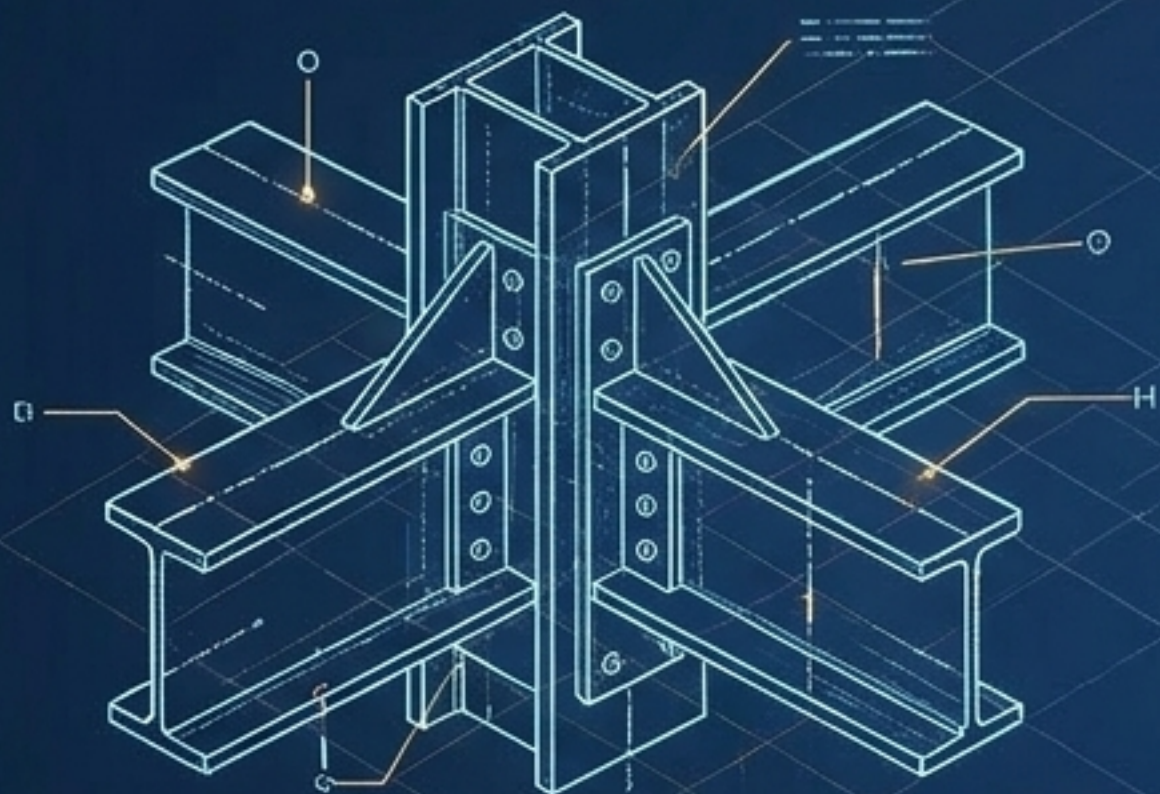

Testing & Maintenance

Rigorous testing protocols and ongoing system maintenance.

Guaranteeing safe, efficient, and standards-compliant electrical infrastructure for industrial and marine applications.

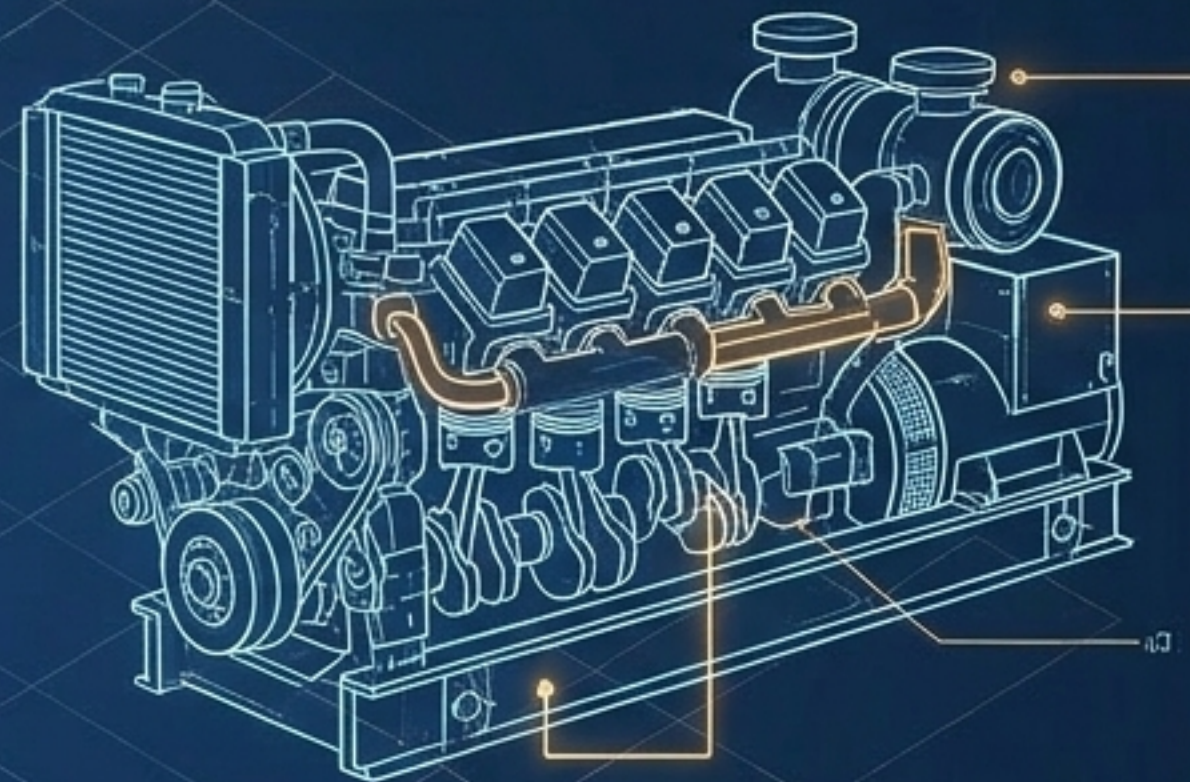

Structural Integrity & Power Security

Fabrication & Industrial Work

- Customized structural and marine-grade fabrication.
- Heavy and light engineering work.
- Precision welding execution (MIG, TIG, ARC).
- Repair and reinforcement of existing structures.

DG Services

- Comprehensive diesel generator solutions.
- Installation, commissioning, and capacity-agnostic repair.
- Complete engine overhaul and diagnostics.
- Load testing, performance optimization, and Annual Maintenance Contracts (AMC).

Supply Chain Division: The Lifeline of Operations

DG Spare Parts
[Comprehensive coverage across all types].

Marine Consumables.

Supply Division

Electrical Consumables

Industrial Maintenance Materials.

Reliable, timely supply chain execution designed to guarantee zero operational downtime.

A Multi-Sector Engineering Partner

Renewable Energy Sector

Naval & Defense Sector

Infrastructure Projects

Custom Department

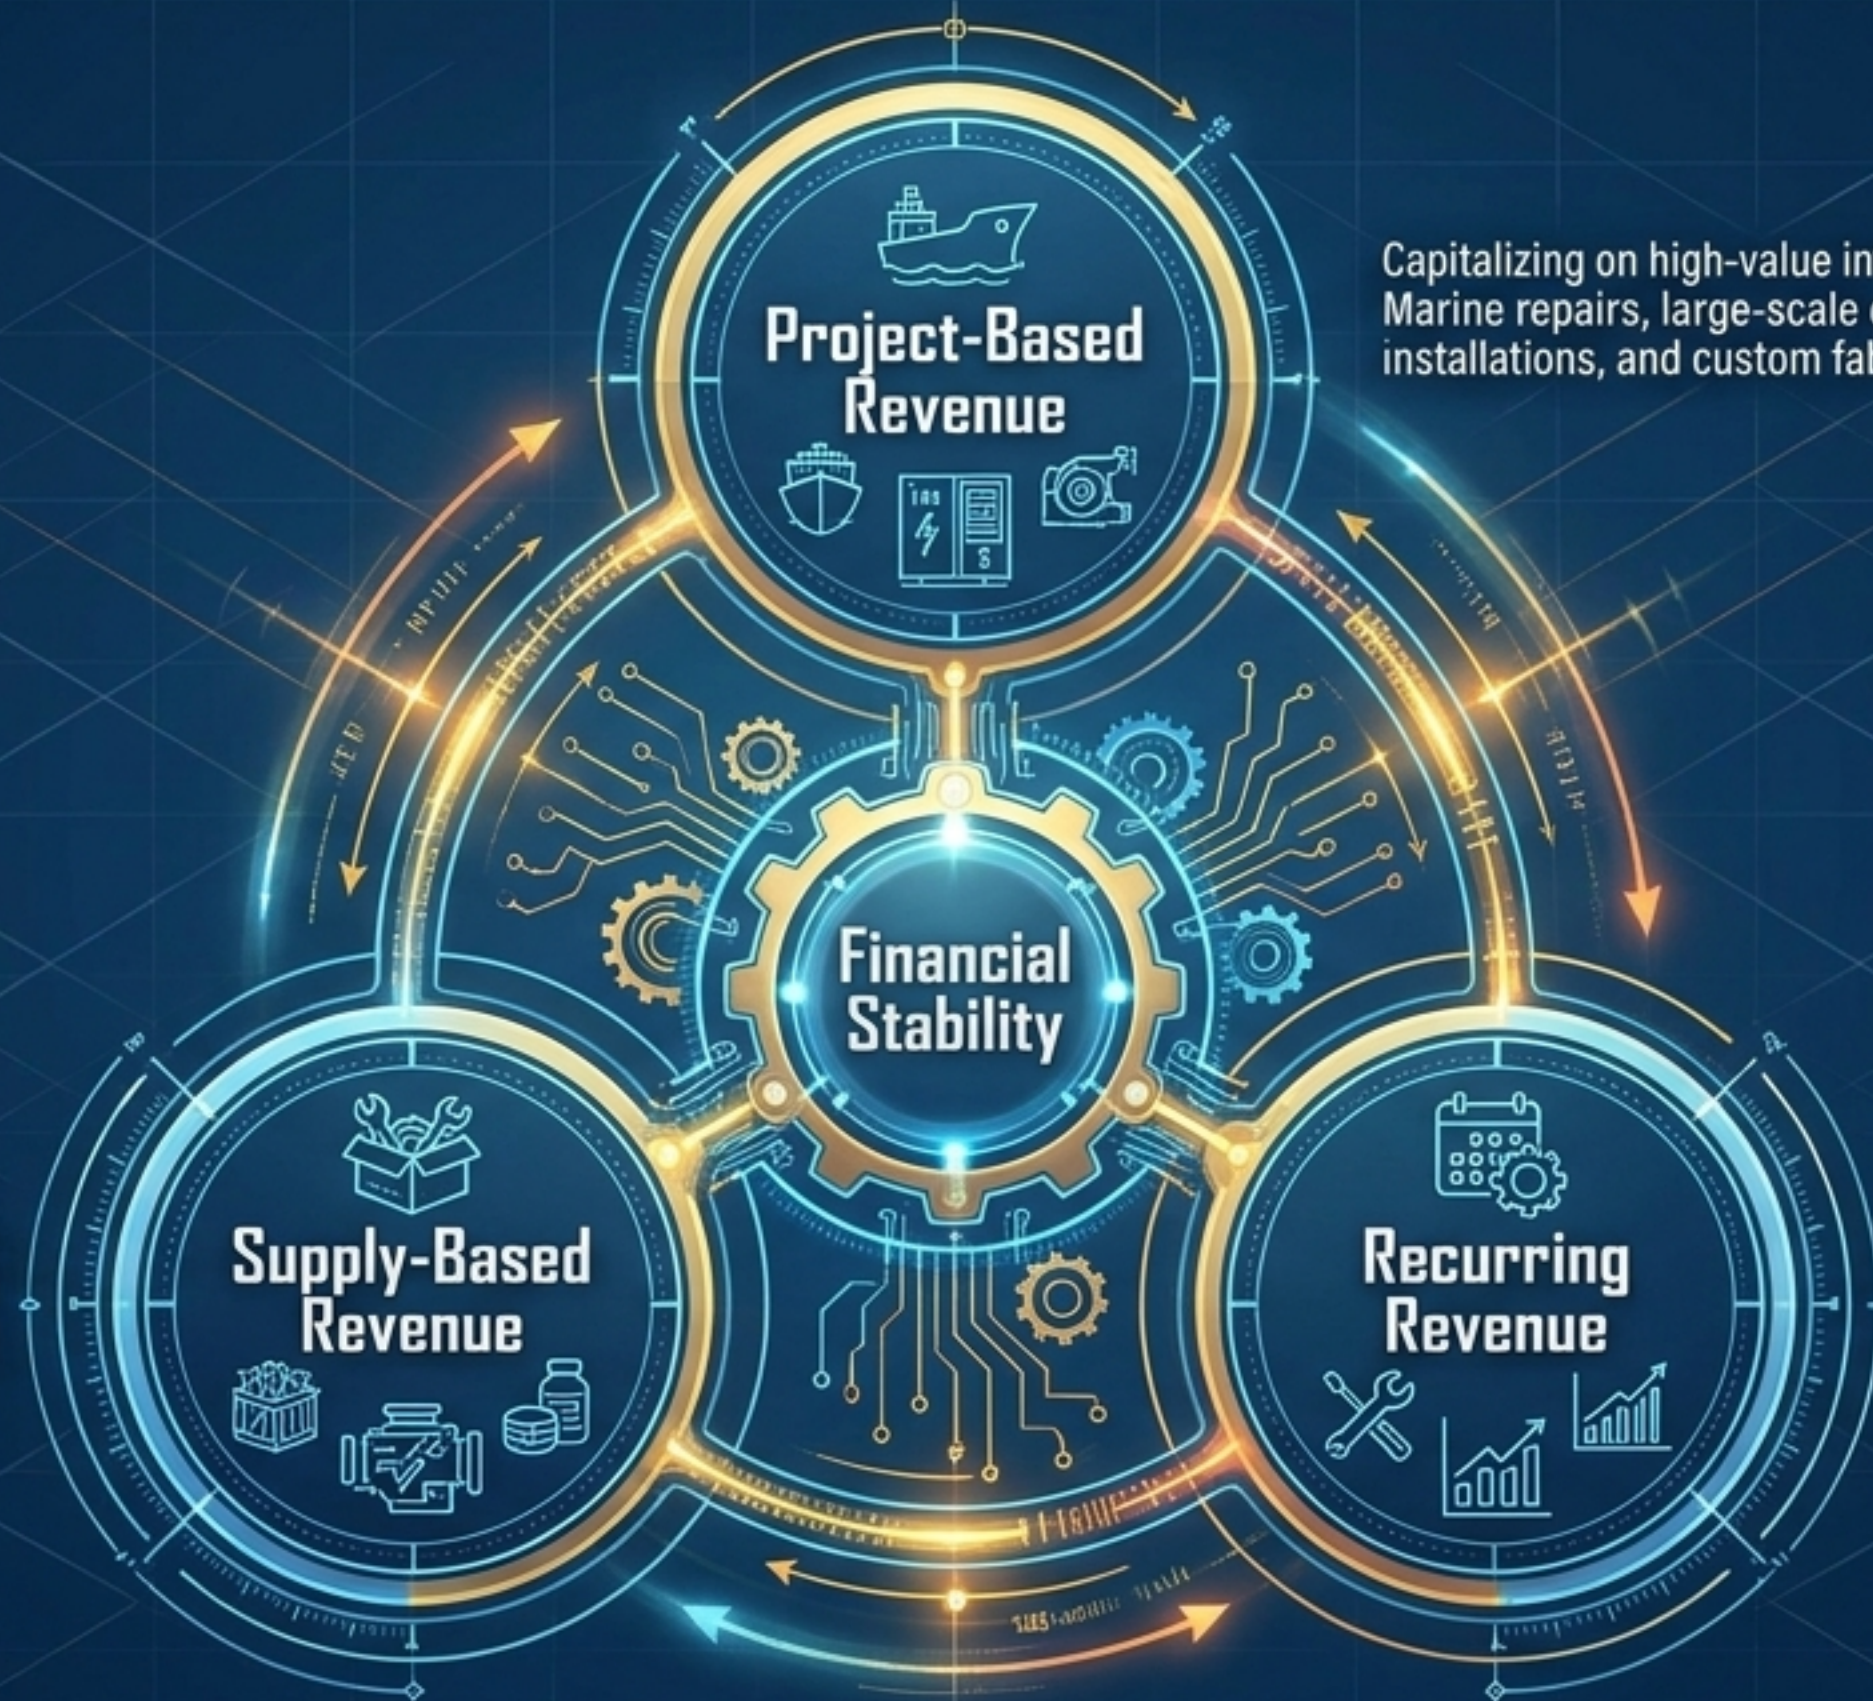

Industrial & Manufacturing Units

Marine & Shipping Industry

Business Model: Engineered for Scalability & Stability

The Execution Protocol: Quality, Safety & Compliance

Standards
Strict adherence to established industry and safety standards from project inception.

Manpower
Deployment of exclusively skilled, continuously trained technical manpower.

Verification
Rigorous quality control checkpoints implemented at every stage of execution.

Delivery
Unwavering commitment to timely, on-spec project delivery.

The Global Horizon: The Mauritius Expansion

Positioning Mauritius as the strategic operational gateway to African and international engineering markets.

Dry Dock & Marine

Ship repair, hull inspection, and comprehensive refurbishment facilities.

Shipbuilding

Design, construction, and advanced modular shipbuilding solutions.

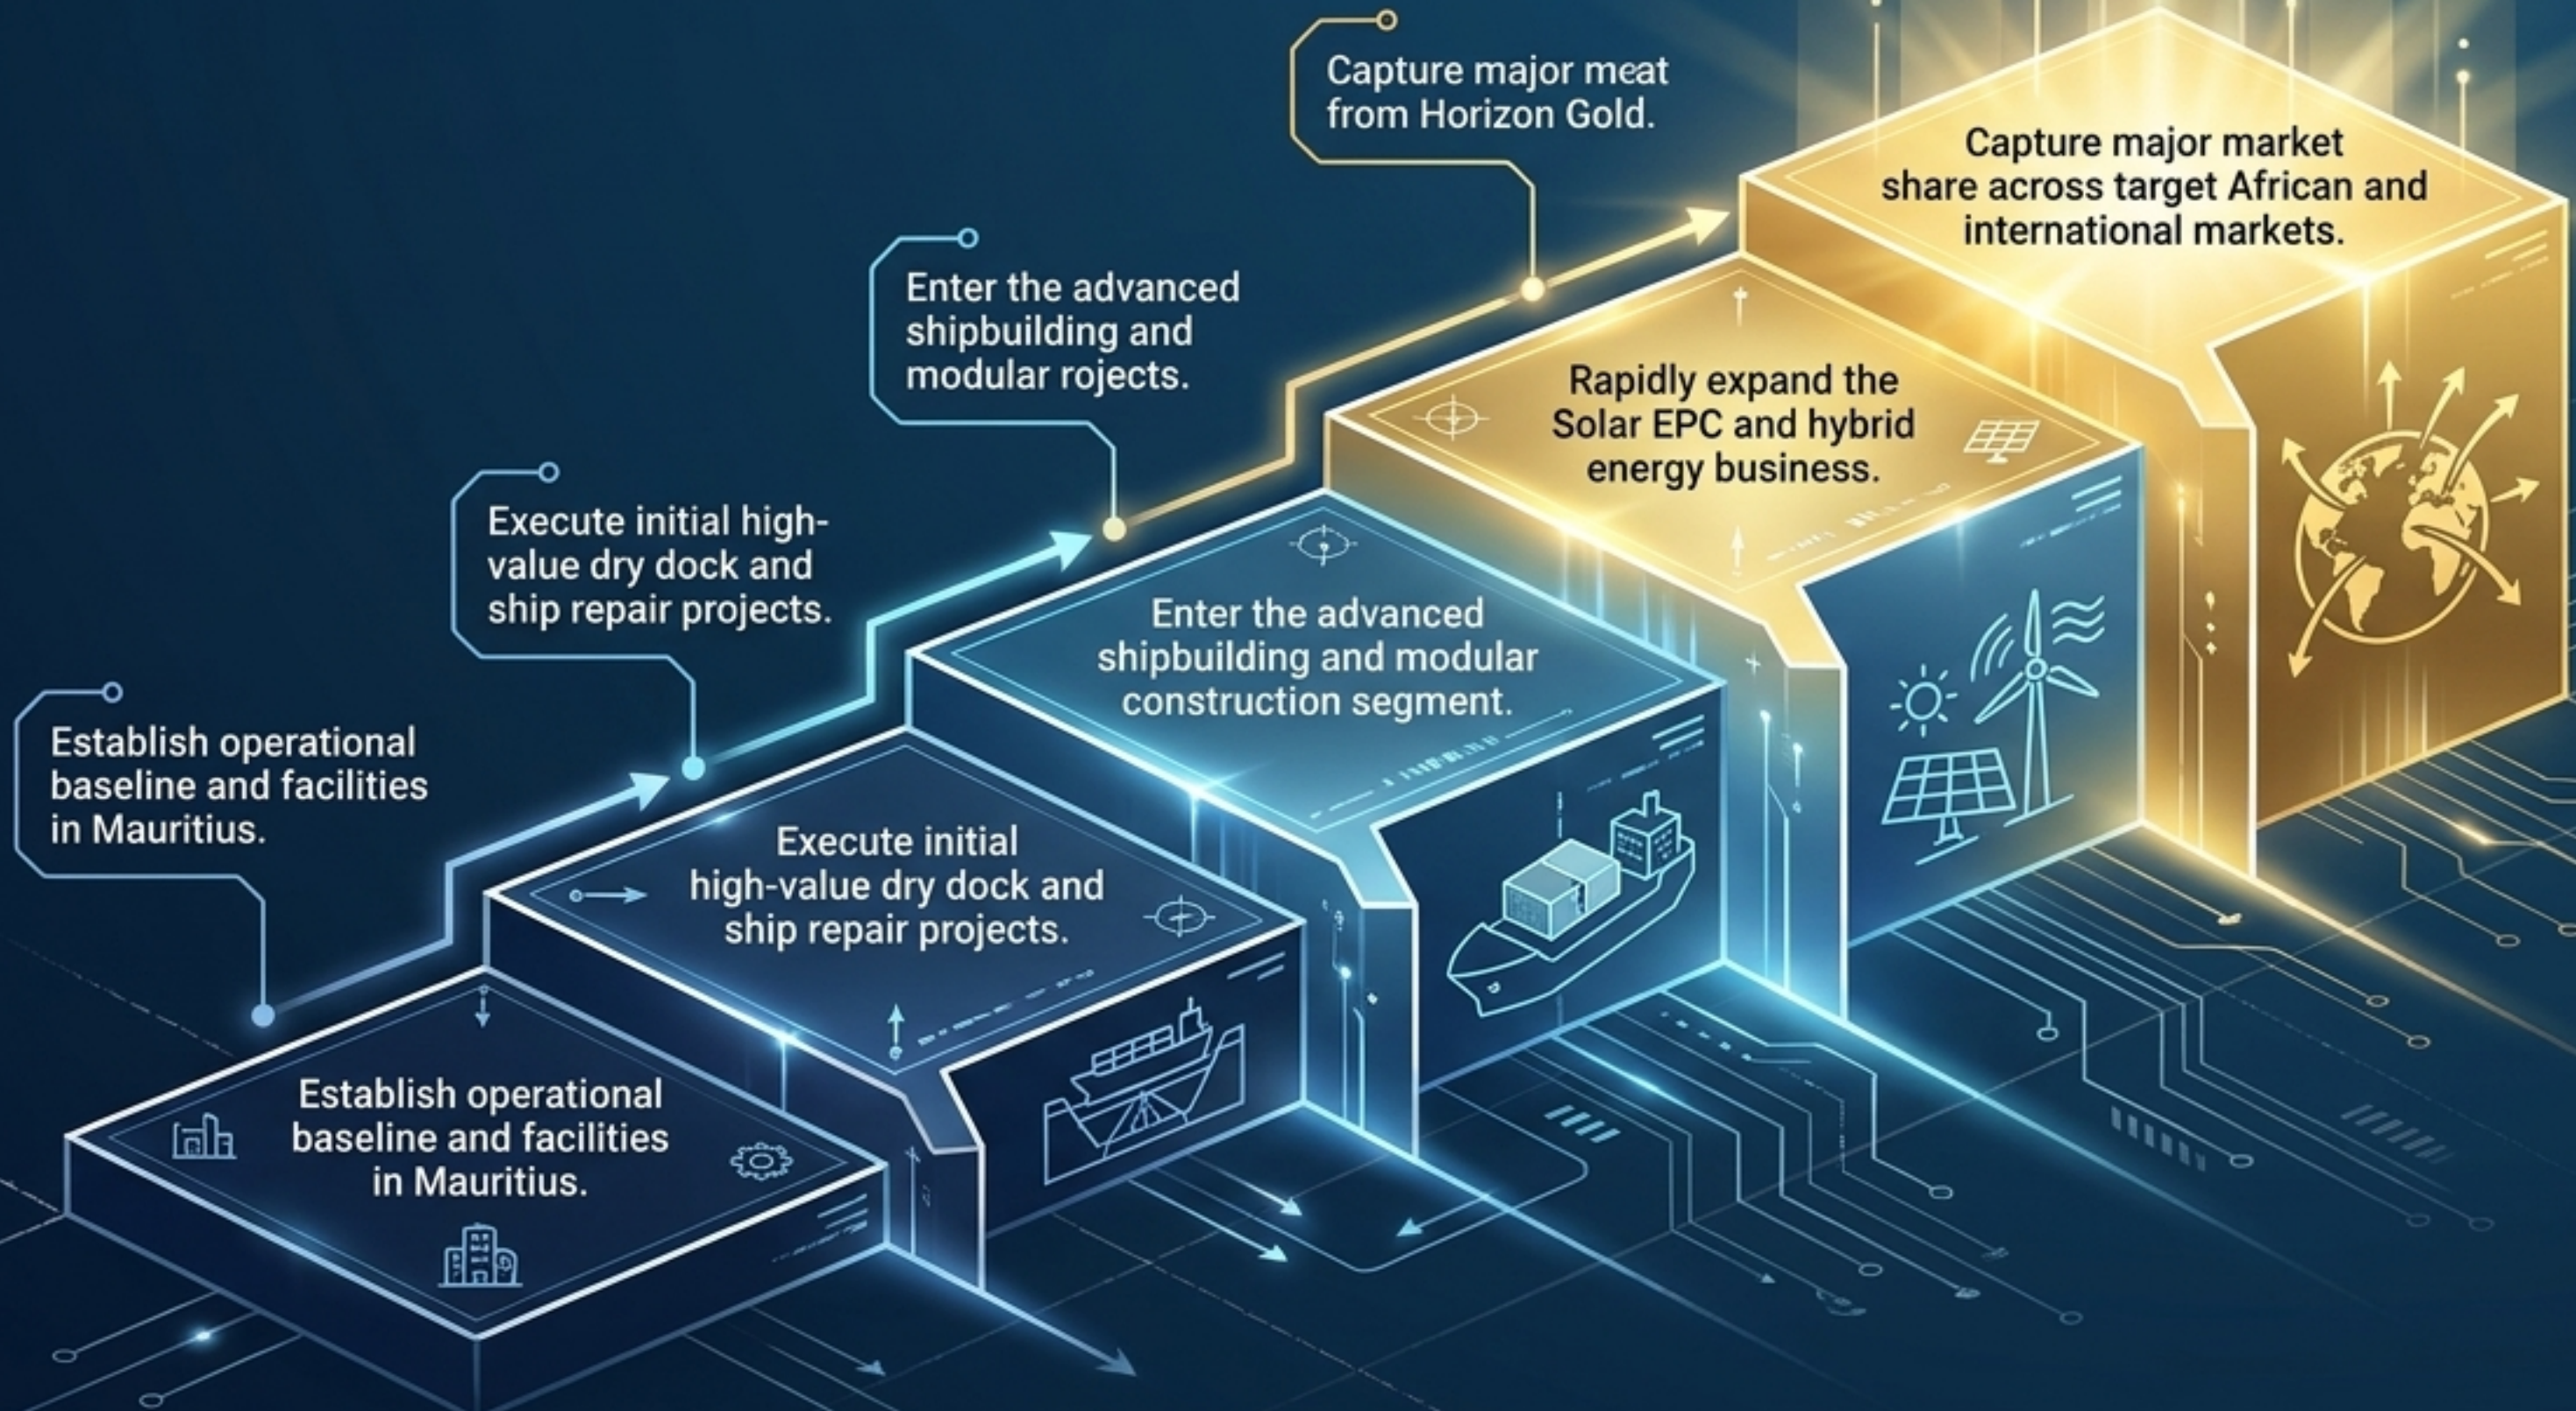

Solar & Renewable

Solar EPC projects, hybrid energy solutions, and complete Operation & Maintenance (O&M) services.

Strategic Roadmap for Future Growth

The Harsh Advantage

Initiate Contact

Ready to engineer the future.
